

IN THE CLAIMS

1-68. (canceled)

69. (currently amended) A method for inhibiting tumor cell growth in an animal, comprising administering to said animal an effective amount of a composition consisting essentially of a hemagglutinating virus of Japan envelope (HVJ-E), wherein the HVJ-E contains no exogenous nucleic acid.

70-91. (canceled)

92. (previously presented) The method of claim 69, wherein IL-12 and IL-6 in dendritic cells are induced or regulatory T cells are inhibited.

93. (previously presented) A method for inhibiting tumor cell growth in an animal, comprising administering to said animal an effective amount of a composition consisting of a hemagglutinating virus of Japan envelope (HVJ-E) and a pharmaceutically acceptable carrier.

94. (previously presented) The method of claim 93 wherein IL-12 and IL-6 in dendritic cells are induced or regulatory T cells are inhibited.

95. (new) A method for inhibiting tumor cell growth in an animal, comprising administering to said animal an effective amount of a composition consisting essentially of an empty hemagglutinating virus of Japan envelope (HVJ-E).

96. (new) The method of claim 69 wherein the composition is administered by injection.

97. (new) The method of claim 93 wherein the composition is administered by injection.

98. (new) The method of claim 95 wherein the composition is administered by injection.
